

Project Rubrics

There are four parts of the project:

1. Data collection and preprocessing.
 - A. **Title and teammates**
Please decide your team members and project topic.
 - B. **Collecting and storing the data**
Please decide the target domain of your project. You will need to prepare the data for your project and store it in the database.
 - C. **Data Preprocessing**
Please describe the original data quality, what strategies you've tried to improve it, and any additional calculations you applied.
 - D. **Report**
Please describe your project topic, how you collect the data and the details of the data, such as size, data format and so on in your report. Each team needs only one submission of the report by one of the team members.
2. Data analysis.
 - A. Problem definition
Please describe what specific questions you are about to answer with your project.
 - B. Feature selection
Please select the group of features you will use based on your data and reasons.
 - C. Model training
Please describe which model(s) you applied? Which model(s) perform better than others?
Which metric you used to evaluate the performance of your model(s)? Did you try to improve the results?
 - D. Visualization
Please include any initial results you have with your data, such as analysis on one feature, the distribution of the collected data.
 - E. Report
Please include all the above in your report.
3. Summarization.
 - A. Conclusion
Please conclude your project including the results, such as the importance of different features, the factor(s) impacting training efficiency.
 - B. Future work
Please analyze if further improvement can be done.
 - C. Report
Please include all the above in your report.
4. Final project report
Please list the team members and roles in your report. Only one final report needs to be submission per team. Your final report can build upon your previous submissions for the previous steps. Please make sure it includes:
 - a. problem definition.
 - b. analysis, solution and results.
 - c. further discussion for the result and lessons you learned.
